

## HEP906 ENGAGED RESEARCH PROJECT

### Student workload:

No. hours student engagement per week	No. personal study hours per week	Total workload hours per week
4	8	12

### Delivery Mode:

Face-to-face at HELI's Melbourne campus and online via HELI's Cloud campus. Learners will need to have access to an electronic device (such as a laptop, tablet or smart phone) with internet access to successfully undertake this subject.

### Pre-requisites:

There are no pre-requisites for this subject.

### Subject requirements:

To successfully complete this subject a student must attempt all assessment tasks and achieve at least 50% of the total marks.

### Subject Aim and Content:

The aim of this subject is to provide students with the opportunity to *create* a defined piece of independent research or to independently *develop* an artefact that further fosters the development of high-order eLearning knowledge and skills.

There is no conventional content in this subject as such. Instead it caps the course off with a creative endeavour in which students develop a research project, a course, a subject or similar. It must of course relate to eLearning.

The subject will also enable students to demonstrate their capability in writing high-level research and development results. The students should also demonstrate mastery of time-management and the presentation of research and development outcomes.

### Subject Learning Outcomes:

On successful completion of this subject students will be able to:	
SLO1	Create a defined piece of independent research or to develop an artefact that relates to eLearning, based on a research and development design.
SLO2	Write high-level research and development progress reports.
SLO3	Manage their time, balancing competing commitments and meeting task deadlines.
SLO4	Devise a means of effectively presenting research and development outcomes to stakeholders.

**Delivery and Assessment Plan:**

Week	Topic	Assessment Timing
<p>Orientation: in addition to the major project for this subject, Discussion Forums activities will be used throughout the duration of the study period to support your progress, to enhance communication and networking, to help monitor the management of your time, and to support your achievement of the subject learning outcomes.</p>		
Week 1	Student personal study with online supervision available	
Week 2	Student personal study with online supervision available	
Week 3	Student personal study with online supervision available	Discussion Forum 1
Week 4	Student personal study with online supervision available	
Week 5	Student personal study with online supervision available	Discussion Forum 2
Week 6	Student personal study with online supervision available	
Week 7	Student personal study with online supervision available	
Week 8	Student personal study with online supervision available	Discussion Forum 3
Week 9	Student personal study with online supervision available	
Week 10	Student personal study with online supervision available	Assessment 2: Research Project submission
